J H the bunch tail. But still he was tail. But still he was tail, but still he was young and gegan at the was young and giddy the mile was proug and giddy the mile was proug and giddy the mile was young and giddy the mile was proug and giddy the mile was prought to his brain. The mile very naturally used his heels more to luxuriant a state, to the detriment of his brain. The mile very naturally used his heels more than any other portion of his ody. In fact, he was as well heeled as Vander-bly and toes and generates, 20c a pair.

dies striped outon hose, in the provided of t of his ears to the end of the longest hair in the bunch on the end of his tail. But still he was charitable. He thought the education of the mule had been sadly neglected. The common fault was that his training began at the wrong terminus of the animal. When he was young and giddy the mule was pursuaded by the application of a two-inch-plank to his southern exposure. By the time the trainer got to his shoulder a baseball club was used, and his head was cultivated so much that his ears grew to too luxuriant a state, to the detriment of his brain. The mule

both cases the same. As a matter of fact the average distance from a mule's ear to the driver's fluke is seven feet eight inches, and stationary. Weather cloudy and the driver's fluke is seven feet eight inches. But he yells as if the brute were avound the part corner. The market lead he parted: City of Natches and City of Caire, St.
